- DataBase: mongoDB, NOsql
- Tools: VScode, Git , github

Concepts

- CRUD Opration
- Oops
- Data Structures and Algorithms (Basic)

PROFILE

Full Stack Developer (MERN) fresher with hands-on experience building responsive web applications using React, Node.js, Express, and MongoDB. Strong understanding of REST APIs, authentication, and state management. Passionate about clean code and scalable architecture.

PROJECTS

- **Food Delivery Frontend Application** [Link](#)
 - Built a responsive Food Delivery Web Application using React.js and Tailwind CSS.
 - Implemented cart and state management with Redux Toolkit, including add/remove items, quantity control, and real-time price calculation.
 - Enhanced user experience with hover effects and toast notifications using React Toastify.
- **Responsive TodoApp** [Link](#)
 - Built a responsive To-Do app with full CRUD functionality (add, edit, delete tasks).
 - Implemented circular (percentage) and linear progress bars to track task completion.
 - Added real-time updates with automatic strike-through for completed tasks.
- **Hotel Booking Application** [Link](#)
 - Built a full-stack hotel booking web application using React, Tailwind CSS, Node.js, Express.js, and MongoDB.
 - Implemented user authentication, dashboards, hotel/room listing, search with filters, availability checking, and online payment flow.
 - Gained hands-on experience in REST API development, database integration, and frontend-backend connectivity.
